We keep overestimating how much it comes in and underestimate how much we spend. If your salary is not set, then work your averagefor the last 6 or 12 months. Include all income from all sources (including wages, benefits, investments, etc.). Often we do not trace small quantities but tend to add and reach very much large quantities! To understand exactly how much you spend, it is necessary to monitor expenses and expenses. The best way to obtain an accurate image is to follow this for a period of at least two months up to a year. If you only follow for two months, so do not forget to add the annual expenses that occur during other periods of the year as a summer holiday. This gives you an average amount per month that a long -term realistic picture will be. If you use the credit card for most purchases, you can use statements to monitor transactions and classify them in the set groups. You can also check your bank statements. Don't forget to add cash purchases. This helps you know how much you usually spend to fix a realistic goal. There is no use in the setting of a goal to which you can not follow. Once you have listed your expenses, Skim the following list to make sure you have not forgotten anything: rent, mortgage, food, entertainment (movements, family expenses during summer holidays, education or education or loan expenses of students, cable, internet, cars payments, petrol, and public transport or public transport costs, health insurance, assistance for children if pertinent, ownership fees, invoices, donations, donations, requirements, requirements, pharmacies, Pharmacies, pharmacies, pharmacies, pharmacies, pharmacies, pharmacies, pharmacies, pharmacies, insurance, pharmacies, insurance, pharmacies, insurance companies, insurance companies, insurance, insurance ovittac ovittac id asoclaug icsonocir eS .02-03-05 aloger al noc etanilla onos ilisnem eseps eut el es eraefirev rep oicnalB id erotaloclae ortson li asu .eseps eut el otacnele lah ehc arO .ongtosib eteva iuc id esoc el rep oseps eresse ebbervod otidder ortsov led %05 li .02-03-05 aloger al odnoceS .elismem elatot nu eregnuiggar rep elanosrep oicnalB id olledom len eseps el ettut eredulcnI .ilanoizersid e ilibairav .essif eseps ni eseps eut el aloclaC asac id Get used to creating your personal monthly budget, now is the perfect time to deal with them. This will help you achieve your short and long-term budget goals. If you have more than one spender in your family, make sure everyone is in the photo and monitoring expenses. If you use a Google Sheets budget template (see above), each Spender may have access to the spreadsheet to update it in real time. Do not forget to add unexpected expenses such as doctor, children, fines, etc. If you are creating a family budget planner, then consider spending in the future. Even if your children are small, you still want to start the college budget and other great expenses that will occur only in the future. This will give you a picture of how much of your expenses go in every category. If you need to spend less, it will help you see where you should cut. Most models have categories of example expenses. If you want to change categories, use editable templates like an Excel file or a Word document. Set a budget target Your goal can be to spend less than X or save you. You can try to reduce expenses in general or by a specific category. Should you create a weekly or monthly budget? A weekly budget may allow you to deepen, but it may not be accurate if certain expenses do not occur every week. However, if you are paid weekly, you may prefer to use a weekly budget tracker. A monthly budget tracker will probably be more accurate and is better when you get paid monthly. In most cases, no matter if you have a weekly or monthly income, a monthly budget is usually better than a weekly one. Review your budget and make changes if required sometimes things change or you realize you have .olanroigga .olanroigga ,otidder out li otatulavvarpos ivort it eS .atsip ni erenamir id itarucissa rep tegdub out li etnemraloger idevir .eseps enucla enoizaredisnoc ni erednerp id .oicnalB .oicnalB lus erenamir rep eseps el orteidni erailgat .Árvod is es erallortnoc oirassenec eresse ebhertop ,oirartnoc osac ni .tegdub lus arocna eresse id itarucissa e alanroigga idniug aseps aut al otatulavottos lah
